Instruction Disclaimer

Dennis Kirk provides instructions to help our customers better understand how to install the products we sell. The instructions are exact copies of what the manufacturer includes with the product being sold.

That means the quality and accuracy of the instructions is solely dependent on what the manufacturer produces. We do our best to make the text legible and the pictures viewable. However, the end result depends largely on the quality of instructions the manufacturer provides.

Therefore, you will find that some instructions are not of the highest quality. Sometimes text is hard to read and pictures are not easy to see. At times you will find the overall look of the instructions to be less than professional. However, we feel it is better to provide what we have rather than provide nothing at all.

To the best of our knowledge the instructions and application information contained in the instructions is accurate. However, Dennis Kirk assumes no liability related to any errors that may be contained in the copy of the manufacturer’s instructions we provide. Buyers are solely responsible to insure that product use is consistent with their application.

If you have any questions please contact us at customerservice@denniskirk.com or 800-969-7501 so we can further assist you regarding additional product information or any other business related questions.

Thank you for doing business with Dennis Kirk.
RockHoodz installation on Harley Davidson

Congratulations on your new RockHoodz, all of us here at Reckless Motorcycles hope you will enjoy the product and enjoy many happy miles.

Please read through the instructions completely before installation.

**Step 1:** Remove your windshield and unscrew the 3 bolts provided to fasten the RockHoodz into place. Please note that the short bolt will go in the center position. See the pictures below for reference. You may now slide your windshield back on.

If you have a Switchback, you will need to insert the 11mm spacer between the Rockhoodz and the windshield. The spacer will go on the center bolt. Three longer bolts will be included.

Remove your rubber windscreen grommets and replace them with the 2x grommets & 2x washers included in the kit as shown on the pictures below. Please note that these new grommets are very important because
will allow you to securely mount and fasten the RockHoodz to the motorcycle. This is only for the top two mounts.

**Step 2:** Please reference your owner’s manual for wiring diagram if needed.

Installing wiring harness: Thread your power cord under your gas tank to the battery, please note to leave enough cord so that it will not pull at all when you turn you handlebars.

There are 3 wires: The yellow and red are the battery positive and go to the inline fuse. The inline fuse will go to the battery positive. The green is the negative and goes to the battery negative.

DO NOT forget to wire the inline fuse in. These units will not work wired to the ignition.

**IMPORTANT:** PLEASE MAKE SURE TO ALWAYS INSTALL THE INLINE FUSE BETWEEN THE BATTERY POSITIVE AND THE POSITIVE WIRE ON THE WIRING HARNESS.

Make sure the toggle switch located on the bottom left of the Rock Hoodz is turned on. You will need to turn it off when you shut the bike off.
