Instruction Disclaimer

Dennis Kirk provides instructions to help our customers better understand how to install the products we sell. The instructions are exact copies of what the manufacturer includes with the product being sold.

That means the quality and accuracy of the instructions is solely dependent on what the manufacturer produces. We do our best to make the text legible and the pictures viewable. However, the end result depends largely on the quality of instructions the manufacturer provides.

Therefore, you will find that some instructions are not of the highest quality. Sometimes text is hard to read and pictures are not easy to see. At times you will find the overall look of the instructions to be less than professional. However, we feel it is better to provide what we have rather than provide nothing at all.

To the best of our knowledge the instructions and application information contained in the instructions is accurate. However, Dennis Kirk assumes no liability related to any errors that may be contained in the copy of the manufacturer’s instructions we provide. Buyers are solely responsible to insure that product use is consistent with their application.

If you have any questions please contact us at customerservice@denniskirk.com or 800-969-7501 so we can further assist you regarding additional product information or any other business related questions.

Thank you for doing business with Dennis Kirk.
ATTENTION INSTALLER (if other than owner): Please forward this Instruction Sheet to the purchaser of this product. These instructions contain valuable information necessary to the end user.

INTRODUCTION: These instructions describe the procedure for properly installing Drag Specialties Seats for custom stretch tanks. Review these instructions carefully before beginning, as they contain important information. Please retain for future reference.

Particularly important information is distinguished in these instructions by the following notations:

NOTE: A NOTE provides key information to make procedures easier or clearer.

CAUTION: A CAUTION indicates special procedures that must be followed to avoid damage to the motorcycle and/or accessories.

WARNING: A WARNING indicates special procedures that must be followed to avoid injury to a motorcycle operator or person inspecting or repairing the motorcycle.

ABOUT THE SOLAR REFLECTIVE TECHNOLOGY

Solar Reflective Technology keeps the seating area cool even in direct sunlight. The process has been shown to reduce surface temperatures by as much as 25°F.

NOTE: The Solar Reflective Technology is only available on select models. See catalog for specific applications.

CAUTION: The use of leather conditioner or chemicals will void the warranty. Warm water, mild soap and a soft cloth should be used for cleanup.

INSTALLATION

NOTE: The step washer in the rear mount will be required on all applications with a weld-in fender nut. If your application uses a clip nut, remove the step washer from the rear bracket.

1. On your new seat, loosen the two screws securing the rear bracket so the bracket will move with some resistance.

2. Install the seat securing the front into the tab on the rear of the fuel tank. Bump the seat forward, closing the gap between the seat and the fuel tank.

3. Adjust the rear bracket to line up with the hole in the fender. Remove the seat, tighten the rear bracket and reinstall the seat.
