Instruction Disclaimer

Dennis Kirk provides instructions to help our customers better understand how to install the products we sell. The instructions are exact copies of what the manufacturer includes with the product being sold.

That means the quality and accuracy of the instructions is solely dependent on what the manufacturer produces. We do our best to make the text legible and the pictures viewable. However, the end result depends largely on the quality of instructions the manufacturer provides.

Therefore, you will find that some instructions are not of the highest quality. Sometimes text is hard to read and pictures are not easy to see. At times you will find the overall look of the instructions to be less than professional. However, we feel it is better to provide what we have rather than provide nothing at all.

To the best of our knowledge the instructions and application information contained in the instructions is accurate. However, Dennis Kirk assumes no liability related to any errors that may be contained in the copy of the manufacturer’s instructions we provide. Buyers are solely responsible to insure that product use is consistent with their application.

If you have any questions please contact us at customerservice@denniskirk.com or 800-969-7501 so we can further assist you regarding additional product information or any other business related questions.

Thank you for doing business with Dennis Kirk.
Instructions for Linbar®, Multibar® and Unibar®
Part # 115-1, 1315, 1415
Fits Sportster Rubber Mount Engine 2004-up

1. Remove two bolts in upper front engine stabilizer.
2. Install supplied brackets between the forward controls and the frame on left and right side.
   NOTE: On motorcycles with mid controls install the brackets on the 2 mounting points where the forward controls mount. Use the 3/8" x 1" bolts supplied.
3. Install the top mount of the highway bar using the 2 bolts you uninstalled in step 1.
4. Install the 2 lower mounts of the highway bar to the brackets you installed in step 2, using provided nuts, bolts and washers.
5. Tighten all bolts to factory spec.
6. Hardware included:
   -2 Hex bolt 3/8 x 16 x 1 1/4
   -2 Hex bolt 3/8 x 16 x 1 1/2
   -4 Hex bolt 3/8 x 16 x 1
   -2 Nylon lock nuts 3/8 x 16
   -10 Sae flat washers 3/8
   -2 Brackets with Slot

*Bar width: 31"

NOTE: If there is not enough clearance between front exhaust and the highway bar, adjustment of exhaust system may be needed.
