Instruction Disclaimer

Dennis Kirk provides instructions to help our customers better understand how to install the products we sell. The instructions are exact copies of what the manufacturer includes with the product being sold.

That means the quality and accuracy of the instructions is solely dependent on what the manufacturer produces. We do our best to make the text legible and the pictures viewable. However, the end result depends largely on the quality of instructions the manufacturer provides.

Therefore, you will find that some instructions are not of the highest quality. Sometimes text is hard to read and pictures are not easy to see. At times you will find the overall look of the instructions to be less than professional. However, we feel it is better to provide what we have rather than provide nothing at all.

To the best of our knowledge the instructions and application information contained in the instructions is accurate. However, Dennis Kirk assumes no liability related to any errors that may be contained in the copy of the manufacturer’s instructions we provide. Buyers are solely responsible to insure that product use is consistent with their application.

If you have any questions please contact us at customerservice@denniskirk.com or 800-969-7501 so we can further assist you regarding additional product information or any other business related questions.

Thank you for doing business with Dennis Kirk.
Leather Care Advice for your Danny Gray Seat:

1. Keep your leather clean…

   Clean your leather seat often. Using a clean damp cloth wipe the surface clean. The use of a mild soap or saddle soap will work well for more soiled areas.

2. Dry wet leather slowly…

   The leather on your seat, when exposed to direct heat after becoming wet, will become dry and brittle. Never dry leather next to a heat source, instead wipe off excess moisture and allow drying naturally in an open dry area at room temperature.

3. Condition your seat regularly…

   Leather conditioning is similar to skin conditioning in that the applications of leather dressing replace many of the oils that have dried up since the leather was tanned. Apply “Danny Gray Leather Dressing” generously to clean dry leather, including seams. Let dry at room temperature and wipe off the excess dressing the next day. This will rejuvenate the leather and make the leather water resistant.
